**Discuss/Recommend Recodification Changes.**

The Mayor stated that the council had the packet of changes for the recodification for around two weeks to read over. Kathie explained that she told the code service that she would have the changes to them by the end of June. The code service would then take until approximately September to get back to us a final draft. Karen explained that a resolution would need to be passed at council regarding the new code and then we would need to put the code out for citizen inspection for two weeks. After that the code will be adopted as an ordinance. She figured that would be a period of about one month. Karen and Kathie then reviewed the editorial analysis and extra spreadsheet of changes that were put together along with input from the department heads. Karen reviewed and read an ordinance she had drawn up regarding the Golf Course Operations committee. She recommended that we put it in on the July Finance agenda for discussion and then adopt it at the August council meeting. The Mayor gave his opinion as to the wording he wanted added to the powers and duties section. Karen took notes on the recommended changes. Kathie will be making the changes to the document and putting on the July Finance agenda.
